MINIGRID makes a switch plate however you like.

CLICK[®]
Electrical Innovation

Flexibility of range comes as standard.

Over 500 different modules to select from

Every installation's different – but they've got a lot in common - like the components of the mains wiring. MINIGRID modules make it easy to configure and install accessories – saving you valuable time and money.

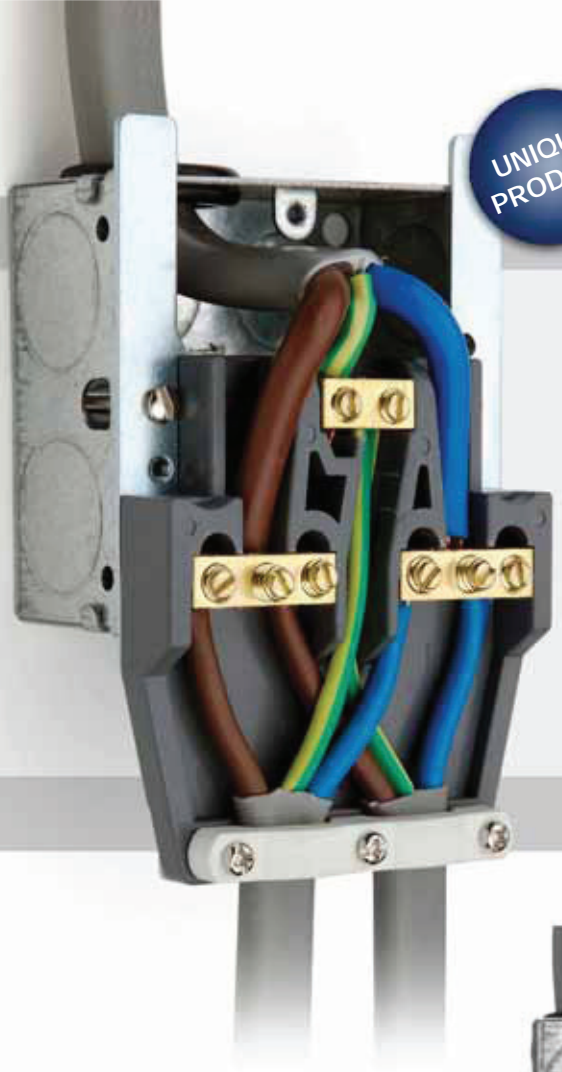

- Easy and quick to install with simple screw fixing
- 14 printed legends available as standard on double pole switches

Fitted as standard in CLICK Wiring Accessory ranges

We've shown just a sample of the Minigrid range. To see the full range or for more details, log onto www.scolmore.com and register for your FREE CLICK pocket catalogue, or download our Modules brochure.

PRW217
45A Max. Dual
Connection Plate

PRW218
Pattress Box
for PRW217

UK Design Registration No. 3015175

- Each incoming and outgoing cables wired independently, making installation easier
- Accepts up to 3 x 16mm² twin and earth with 45A maximum loading
- Dedicated 35mm deep pattress box

Ease of installation is hard-wired into our thinking.

Connecting up a 45A cable isn't easy, is it? – especially on a cold day. So we've thought it out, and come up with a blindingly simple answer – one wire per terminal. It'll save your fingertips – and save you time.

For more details, log onto www.scolmore.com and register for your FREE CLICK pocket catalogue, or download our Polar brochure.

250V~ 16A Push-in Connector
The versatile easy-connection system for fixed wiring applications

Product reference CT100C

Some of our best products are made to come apart.

- Versatile, easy-connection system
- Fast, simple, safe
- All-in-one junction box
- Large terminals with easy access
- Male: Max 1.5mm² 3 core cable;
Female: Max 3 x 2.5mm² twin and earth (with additional loop terminal)

We recognise that your time is money, our Push-In connector gives you easy access with large terminals and fast connection.

Designed initially for lighting circuits to enable isolation of transformers, control gear etc whilst conducting the 'MEGA' 1000V Insulation Resistance Test.

Example of typical wiring

New mains termination block

Easy loop in and loop out.

Since the range was launched in January 2005, FlameGuard downlighters have been re-designed with the mains termination block as seen above, to aid installation and save the additional cost of a junction box.

For more details, log onto www.scolmore.com and register for your FREE CLICK pocket catalogue, or download our Flameguard brochure.

- Wide range of halogen and low energy products
- Complete test reports available on request
- Tested for 30 and 60 minutes with engineered 'I' beam and metal web joists
- Tested for 30, 60 and 90 minutes with solid timber joists
- Allowance of 1 fitting per m² for fire and acoustic
- Compliant with Building Regs Parts B, C, E, L1 and P

12V 60Va Transformer
Product reference TR260

Easy access, easy wiring. Quick work.

Enlarged incoming terminals, simple loop in and out for your cables and rewirable pre-wired output cables; you can see this was designed by a contactor!

- Enlarged incoming terminals with integrated earth terminal and easy access
- Simple loop-in and out for incoming cables
- Rewireable pre-wired output cables allowing for fittings with or without terminal blocks

Professionalism in your pocket

Now you need never be without a solution to your wiring problems, or searching for a product code. It's all here - and it's **FREE**. Simply log on to our website and **register online** to receive your **FREE CLICK®** pocket catalogue.
